Nama: Alya Siti Mukarromah

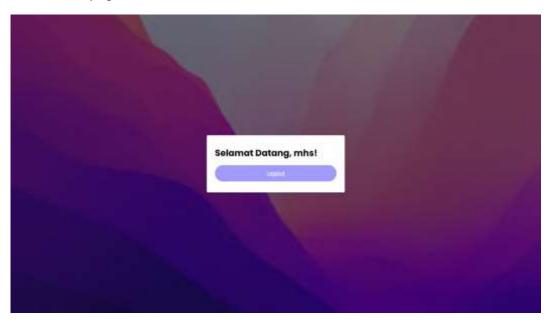

NIM : A12.2020.06486

Laporan Penjelasan Tugas Praktikum 2

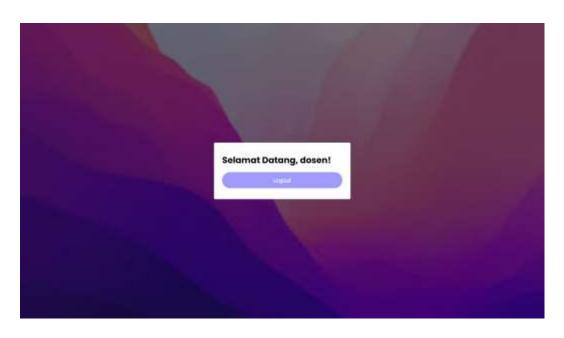

1. Tampilan Login

2. Tampilan Homepage Mahasiswa Jika memasukkan username : "A12.2018.05000" dengan password : "mahasiswa" maka akan masuk ke homepage mahasiswa.

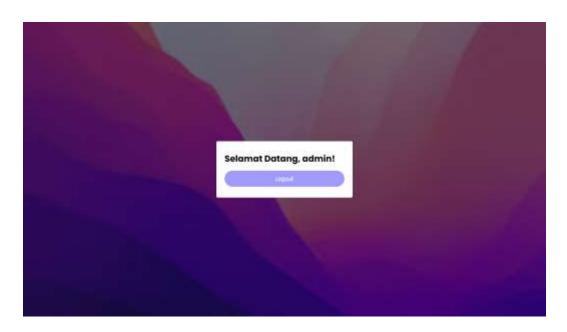

3. Tampilan Homepage Dosen
Jika memasukkan username: "0686.112000.200" dengan password: "dosen" maka akan masuk ke homepage dosen.

4. Tampilan Homepage Admin

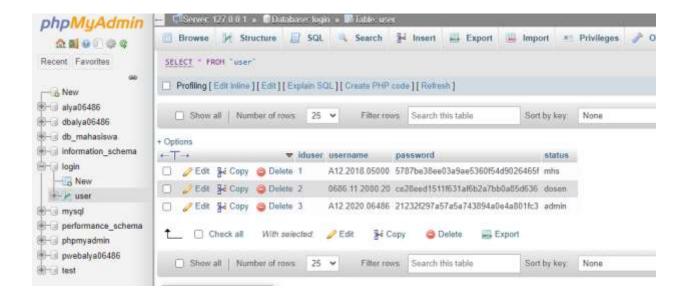

Jika memasukkan username: "A12.2020.06486" dengan password: "admin" maka akan masuk ke homepage admin.

Tampilan Gagal Login
 Jika data yang dimasukkan tidak sesuai maka akan muncul notifikasi seperti gambar dibawah ini.

Database Login
 Database pada password menggunakan enkripsi md5 sehingga password tidak dapat terlihat dan menampilkan teks random.

7. Program Menghubungkan ke server Menghubungkan antara koneksi server program ke database dengan menggunakan server localhost.

```
<!php

$server = "localhost";
$user = "root";
$pass = "";
$database = "login";

$conn = mysqli_connect($server, $user, $pass, $database);

if (!$conn) {
    die("<script>alert('Gagal tersambung dengan database.')</script>");
}

?>
```

Program Tampilan Login
 Program ini digunakan untuk menampilkan tampilan login.

```
<?php
include 'koneksi.php';
error_reporting(0);
session_start();
if (isset($_SESSION['usernamee'])) {
    header("Location: berhasil_login.php");
}

if (isset($_POST['submit'])) {
    $username = $_POST['username'];
    $password = md5($_POST['password']);

$ sql = "SELECT * FROM user WHERE username='$username' AND password='$password''';
    $result = mysqli_query($conn, $sql);
    if ($result->num_rows > 0) {
        $row = mysqli_fetch_assoc($result);
}
```

```
$ SESSION['usernamee'] = $row['usernamee'];
    header("Location: berhasil login.php");
  } else {
    echo "<script>alert('username atau password Anda salah. Silahkan coba lagi!')</script>";
<!DOCTYPE html>
<head>
  <meta charset="utf-8">
  <meta name="viewport" content="width=device-width, initial-scale=1.0">
  <link rel="stylesheet" href="https://stackpath.bootstrapcdn.com/font-</pre>
awesome/4.7.0/css/font-awesome.min.css">
  <link rel="stylesheet" type="text/css" href="style.css">
  <title>membuat halaman login</title>
</head>
<body>
  <div class="alert alert-warning" role="alert">
   <?php echo $ SESSION['error']?>
  </div>
  <div class="container">
   <form action="" method="POST" class="login-email">
      Login
     <div class="input-group">
        <input type="username" placeholder="username" name="username" value="<?php
echo $username; ?>" required>
     </div>
     <div class="input-group">
       <input type="password" placeholder="Password" name="password" value="<?php</pre>
echo $_POST['password']; ?>" required>
     </div>
     <div class="input-group">
        <button name="submit" class="btn">Login</button>
      Anda belum punya akun? <a
href="regiter.php">Register</a>
   </form>
```

```
</div>
</body>
</html>
```

 Program Login Salah
 Program ini digunakan untuk memunculkan notifikasi atau pemberitahuan jika data yang diinputkan salah.

```
if (isset($_POST['submit'])) {
    $username = $_POST['username'];
    $password = md5($_POST['password']);

$sql = "SELECT * FROM user WHERE username='$username' AND password='$password''';
    $result = mysqli_query($conn, $sql);
    if ($result->num_rows > 0) {
        $row = mysqli_fetch_assoc($result);
        $_SESSION['usernamee'] = $row['usernamee'];
        header("Location: berhasil_login.php");
    } else {
        echo "<script>alert('username atau password Anda salah. Silahkan coba lagi!')</script>";
    }
}
```

10. Program pengecekan Akun Database dan Program Login Berhasil
Program ini digunakan untuk mengecek apakah data yang dimasukkan benar. Jika data yang dimasukkan benar maka proses login berhasil.

```
<?php
session_start();

if (!isset($_SESSION['username'])) {
    header("Location: index.php");
}

?>

<!DOCTYPE html>
<html lang="en">
<head>
    <meta charset="UTF-8">
    <meta name="viewport" content="width=device-width, initial-scale=1.0">
```

```
<link rel="stylesheet" href="https://stackpath.bootstrapcdn.com/font-</pre>
awesome/4.7.0/css/font-awesome.min.css">
  k rel="stylesheet" type="text/css" href="style.css">
  <title>Berhasil Login</title>
</head>
<body>
  <div class="container-logout">
    <form action="" method="POST" class="login-email">
      <?php echo "<h1>Selamat Datang, " . $_SESSION['username'] ."!". "</h1>"; ?>
      <div class="input-group">
      <a href="logout.php" class="btn">Logout</a>
      </div>
    </form>
  </div>
</body>
</html>
```

11. Program Logout

Program logout digunakan jika user ingin keluar dari homepage atau ingin memasuki homepage lainnya.

```
<div class="input-group">
<a href="logout.php" class="btn">Logout</a>
</div>
```

```
<?php

session_start();
session_destroy();
header("Location: index.php");
?>
```
